

- In South Carolina, African-Americans account for **over half** of Tuberculosis cases.
- Tuberculosis (TB) is spread through the air from person to person when someone with the disease coughs, sneezes, speaks, or sings.
- The signs and symptoms of TB include:
 - Cough usually lasting 2-3 weeks or longer
 - Coughing up blood
 - Unusual chest pain especially when breathing
 - Increased tiredness
 - Unplanned or sudden weight loss or loss of appetite
 - Chills with fever and sudden night sweats

Talk to your doctor or health care provider if you or a loved one has these symptoms.
